YN Mail Bid Auction and ANA Convention Auction Page 3

Introduction

Each year, the ANA hosts a YN Auction at its annual summer convention, and for the past four years, there has also been a mail bid auction for those unable to attend the convention.

The convention auction will be held Saturday morning, August 14 at 9:30 a.m. in room 3 of the Convention Center.

The mail bid auction wil close on September 13. All Bids must be postmarked on or before that date.

All purchases for both auctions must be paid for with the YN Auction Money you have earned by performing various numismatic activities in your school, club, or community (for more details, please see "Ways for YNs to Earn Auction Money" on Page 7 of this catalog.)

Three things need to be highlighted regarding the "Auction Money"

- This program is retroactive to August 9, 1998, and goes through August 14, 1999, the day of the auction.
 If you perform any of these activites during that period, you earn "Auction Money."
- This program is based upon the honor system. If you choose to participate, we assume that you will be honest and report only those things that you actually did.
- Last Fall you received a form for keeping track of your activities and earned "Auction Money." As you perform an activity, list it, and send this form in with your activities to receive your "Auction Money." It is not too late.
 Either send it in now, especially if you plan to bid by mail, or bring it with you to the convention and you will receive your "Auction Money" at that time.

Auction Rules

The ANA's 1999 Annual Young Numismatist Auction will be held on Saturday, August 14, 1999 at 9:30 a.m. - Room 3 at the Convention Center. Each bidder will receive a number. When bidding on a lot, you will hold up your number. All bids are by lot numbers in the catalog. When the auctioneer's hammer falls, the sale is final. The auctioneer will have the final say as to who gets each lot. All auction lots will be on view at the Education Table at the Convention Center. All winning bidders will be able to pick up their winning lots at the Education Table in the afternoon, after the auction.

YN Mail Bid Auction and ANA Convention Auction Page 5

Terms and Conditions of Sale for ANA's YN Auction

- The highest bidder acknowledged by the Auctioneer shall be the buyer. In the event of any dispute between bidders, the Auctioneer may, at his sole discretion, immediately put the lot up for sale again. The Auctioneer's decision shall be final and binding upon all bidders.
- There are NO buyer's or seller's fees for this auction.
- All bids are to be sold by lot as numbered in this catalog, and no lots will be broken.
- 4. All sales are strictly for "Auction Money" and are due and payable immediately upon receipt of the auction invoice or if payment is to be made at the auction sale, simultaneously with the receipt of the auction coins. ANA reserves the right to void sale if payment in full of the invoice is not received by the Auctioneer within 15 days after the date of the invoice. There will be no tax, shipping, handling or insurance charges added to the price.
- 5. The Auctioneer reserves the right to require payment in full before delivery of the merchandise to the buyer.
- The Auctioneer reserves the right to refuse to honor any bid or limit the amount of any bid, which, in his opinion, is not submitted in "Good Faith."

- No buy or unlimited bids will be accepted.
- 8. The ANA cannot be responsible for your errors in bidding, so check your bid sheet carefully. When identical mail or FAX bids are submitted, preference is given to the first received. To insure the greatest accuracy, you mail bids should be entered on the standard bid sheet form that accompanies this catalog.
- ANA cannot accept telephone bids either before or during the auction.
- 10. NO WARRANTY, WHETHER
 EXPRESSED OR IMPLIED, IS MADE
 WITH RESPECT TO ANY ADJECTIVAL
 OR NUMERICAL DESCRIPTION CONTAINED IN THIS CATALOG.
- 11. Coins sold referencing a third-party grading service ("Certified Coins") are sold "as is" without any express or implied warranty. Certain warranties may be available from the grading services and the bidder should contact those services directly for information about their warranties.
 - No lots may be returned by mail bidders without a written request by the successful bidder and the written approval of the ANA Education Department.

In the unlikely event of returning a lot, the mail bidder must notify the ANA Education Department in writing of the bidder's intent, and such notice must be mailed within three (3) days of the mail bidder's receipt of the lot. Any lot that is

to be returned must be received in our offices within 30 days from the date of the sale. AFTER THAT 30 DAY PERIOD, NO LOTS MAY BE RETURNED. No certified coins may be retuned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer or service. There are absolutely no exceptions to this policy. Lots must be housed intact in the original holder. No lots purchased by floor bidders may be returned. Late remittance for purchases may be considered just cause to revoke all return privileges.

- 13. Coin certification does not guarantee protection against the normal risks associated with potentially volatile markets.
- 14. The descriptions provided in this catalog are intended solely for the use of those bidders who do not have the opportunity to view the lots prior to bidding. All bidders who have inspected the lots prior to auction will not be granted any return privileges.
- Any statement made by the Auctioneer is a statement of opinion and does not constitute a warranty or representation.
- 16. In consideration of participation in the auction and placing of a bid, a bidder expressly releases ANA, the Auctioneer, and Consignor, or Owner of the lot from any and all claim, cause of action,

whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned grade or derivative theory, breath of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Sale or otherwise, except as specifically declared herein.

COLLECTING COINS

Numismatics, or coin collecting, is one of the world's oldest hobbies, dating back several centuries. Coin collecting in America did not develop to any extent until about 1840, as our pioneer forefathers were too busy carving a country out of wilderness to afford the luxury of a hobby. This discontinuance of the large-sized cent in 1857 caused many persons to attempt to accumulate a complete set of the pieces while they

were still in circulation One of the first groups of collectors to band together for the study of numismatics was the

and Philadelphia, organized on January 1, 1858, Lack of an economical method to house a collection held the number of devotees of coin collecting to a few thousand until the Whitman Publishing Company and other manufacturers placed the low-priced coin

boards and folders on the market some years ago. Since that time the number of Americans collecting coins has increased many fold.

THE PRODUCTION OF COINS

To collect coins intelligently, it is necessary to have some knowledge of the manner in which our coins are produced. They are made in factories called "mints." The Mint of the United States was established at Philadelphia by a resolution of Congress dated April 1, 1792. The Act also provided for the coinage of gold eagles (\$10), half-eagles and quarter-eagles, the silver dollar, half-dollar, quarter-dollar, dime (original-

ly spelled "disme"), and the halfdime, the copper cent and half-cent. According to the Treasury Department, the first coins struck were one-cent and half-cent pieces, in March of 1793, on a hand-operated press. Most numismatic authorities consider the half-disme of 1792 as the first United States coinage. Quoting the words of George

> Washington as their authority. Washington. in the annual address. November 6, 1792, said, "There has been a small beginning the the coinage of

the Half-Dismes, the want of small coins in circulation

calling the first attention to them."

UNITED STATES PAPER MONEY

Paper money issued by the United States government is collected widely in this country. The first issue of "greenbacks" was made in 1861; paper money was issued by private parties for circulation prior to that date. Collectors of U.S. Notes prefer them in crisp, new condition; and the condition determines the value of the note.

Before the issuance of the first U.S. government paper money, many banks throughout the country issued their own currency. These issues are commonly referred to as "broken bank notes" although that is somewhat of a misnomer as many of the banks did not "go broke" (a few are

still in existence) and redeemed their paper money issues. There are thousands of varieties of these notes in existence, some of which are very common and worth from \$5 to \$25 each. Before and during the American Revolution, the various individual states and the Continental Congress issued paper money. The more common varieties of these Colonial notes are worth from \$15-\$35; some are quite rare.

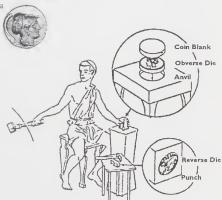

YN Mail Bid Auction and ANA Convention Auction Page 11

ANCIENT COINS

All ancient coins were made by hand, and for this reason, no two coins are ever exactly the same.

Ancient coins were struck from 650 B.C. to 476 A.D. , when the Western Roman Empire fell. All are historic and important artifacts of the ancient world.

Imagine holding in your hand a little fragment of the past, and probably your oldest antique.

Essential Elements of the ANA Grading System

- PROOF A specially made coin distinguished by sharpness of detail and usually with a brilliant mirrorlike surface. Proof refers to the method of manufacture and is not a condition. Normally the term implies perfect mint state unless otherwise noted and graded as below.
- MINT STATE The terms Mint State (MS) and Uncirculated (Unc.) are interchangeably used to describe coins showing no trace of wear. Such coins may vary to some degree because of blemishes, toning or slight imperfections as described in the following subdivisions.
- PERFECT UNCIRCULATED (MS 70) Perfect new condition, showing no trace of wear. The finest quality possible, with no evidence of scratches, handling or contact with other coins. Very few regular issue coins are ever found in this condition.
- GEM UNCIRCULATED (MS 65) An above average Uncirculated coin which may be brilliant or lightly toned and has very few contact marks on the surface or rim. MS 67 or MS 63 indicates a slightly higher or lower grade of preservation.
- UNCIRCULATED (MS 60) Has no trace of wear but may show a number of contact marks, and surface may be spotted or lack some luster.
- CHOICE ABOUT UNCIRCULATED (AU 55) Barest evidence of light wear on only the
 highest points of the design. Most of the
 mint luster remains.

- ABOUT UNCIRCULATED (AU 50) Has traces of light wear on many of the high points. At least half of the mint luster is still present.
- CHOICE EXTREMELY FINE (EF 45) Light overall wear shows on the highest points. All design details are very sharp. Some of the mint luster is evident.
- EXTREMELY FINE (EF 40) Design is lightly worn throughout, but all features are sharp and well defined. Traces of luster may show.
- CHOICE VERY FINE (VF 30) Light even wear on the surface and highest parts of the design. All lettering and major features are sharp.
- VERY FINE (VF 20) Shows moderate wear on high points of design. All major details are clear.
- FINE (F 12) Moderate to considerable wear. Entire design is bold with overall pleasing appearance.
- VERY GOOD (VG 8) Well worn with main features clear and bold although rather flat.
- GOOD (G 4) Heavily worn with design visible but faint in areas. Many details are flat.
- ABOUT GOOD (AB 3) Very heavily worn with portions of lettering, date and legends worn smooth. The date may be barely readable.

IMPORTANT

Damaged coins, such as those which are bent, corroded, scratched, holed, nicked, stained, or mutilated are worth less than those without defects. Flawless uncirculated coins are generally worth more. Slightly worn coins ("sliders") which have been cleaned and conditioned ("whizzed") to simulate uncirculated luster are worth considerably less than perfect pieces. Unlike damage inflicted after striking, manufacturing defects do not always lessen values. Examples are: Colonial coins with planchet flaws and weakly struck designs; early silver and gold with weight adjustment "file marks" (parallel cuts made prior to striking); and coins with "lint marks" (dust or other foreign matter which may mar the surface during striking). For those readers who desire more detailed descriptions of all coin grades, we recommend Official ANA Grading Standards for United States Coins, by the American Numismatic

MISSTRUCK COINS

With the production of millions of coins each year, it is natural that a few abnormal pieces escape inspection and are inadvertently released for circulation, usually in original bags or rolls of new coins. Once generally unappreciated, today these pieces are eagerly sought for the information they shed on minting techniques, and as a variation from normal date and mint series collecting. Nearly every misstruck coin is unique in some way. They may all be classified in general groups related to the kind of manufacturing malfunction involved. Collectors value these pieces according to the scarcity of each kind of error for each type of coin.

ERRORS

- CLIPPED PLANCHET An incomplete coin, missing part of the metal.
- LAMINATION A flaw of metal peeled off the coin's surface.
- WRONG PLANCHET A coin struck on a blank intended for another denomination.
- DEFECTIVE DIE Coin shows raised metal from a large die crack or small rim break.
- 5. BLANK PLANCHET A blank of metal intended for coinage but not struck.
- OFF CENTER Blank was not properly inserted between dies, resulting in part of the design missing.
- BROCKAGE Mirror image of one coin impressed on another.
- 8. MULTIPLE STRIKE Coin has additional image from being struck again. Value increases with number of strikes.

HANDLING COINS

Many coins become marred by careless handling. Always hold the coin by the edge. The accompanying illustration shows the right and wrong way to handle numismatic specimens. It is a breach of numismatic etiquette to handle another collector's coins except by the edge, even if it is not an uncirculated or proof piece.

MINT AND MINT MARKS

Mint marks are small letters designating where coins were made. Coins struck at Philadelphia before 1979 (except 1942-1945 five-cent pieces) do not have a mint mark. Starting in 1979 a letter P was used on the dollar, and thereafter on all other denominations except the cent. Mint mark position is on the reverse of nearly all coins prior to 1965 (the cent is an exception), and on the obverse after 1967. Letters used are as follows:

- C Charlotte, North Carolina (gold coins only, 1838-1861)
- CC Carson City, Nevada, 1870-1893
- D Dahlonega, Georgia (gold coins only, 1838-1861)
- D Denver, Colorado, 1906 to date
- O New Orleans, Louisiana, 1838-1909
- P Philadelphia, Pennsylvania, 1793 to date
- W West Point, New York, 1984 to date

YN Mail Bid Auction and ANA Convention Auction Page 15

Proof Coins

A "proof" is a specimen striking of coinage for presentation, souvenir, exhibition, or numismatic purposes. Pre-1968 proofs were made usually at the Philadelphia Mint. Current proofs are made at San Francisco and West Point.

The term "proof" refers to the method of manufacture and not the condition of a coin. Regular production coins in mint state have coruscasting, frosty luster, soft details and minor imperfections. Proof coins can usually be distinguished by their sharpness of detail, high wire edge, and extremely brilliant mirrorlike surfaces. All proofs are originally sold by the mint at a premium.

FROSTED PROOFS were issued prior to 1936 and started again in the late 1970's. These have a brilliant mirrorlike field with contrasting dull or frosted design.

MATTE PROOFS have a granular "sandblast" surface instead of the mirror finish. Matte proof cents, nickels and gold coins were issued from 1908 to 1916; a few 1921 and 1922 silver dollars were also struck this way.

BRILLIANT PROOFS have been issued from 1936 to date. These have uniformly brilliant mirrorlike surfaces and sharp, high relief details.

PROOFLIKE coins are occasionally seen. These are specimens from the first few impressions of regular coinage dies from any mint. They are not true proofs, but may have most of the characteristics of a proof coin and generally command a premium. Be aware of coins that have been buffed to look like proofs; magnification will reveal polishing lines and lack of detail.

How a Proof Coin is Made

Selected dies are inspected for perfection and are highly polished and cleaned. They are again wiped clean or polished after every 15 or 25 impressions and are replaced frequently to avoid imperfections from worn dies. Coin blanks are polished and cleaned to assure high quality in striking. They are then hand fed into the coinage press one at a time, each blank receiving two or more blows from the dies to bring up sharp, high relief details. The coinage operation is done at slow speed with extra pressure. Finished proofs are individually inspected and are handled with gloves or tongs. They also receive a final inspection by packers before being sonically sealed in special plastic cases.

After a lapse of twenty years, proof coins were struck at the Philadelphia Mint from 1936 to 1942 inclusive. In 1942, when the composition of the five-cent piece was changed, there were two types of this denomination available to collectors. The striking of proof coins was temporarily suspended from 1943 to 1949, and again from 1965 to 1967; during the latter period special mint sets were struck. Proof sets were resumed in 1968. They are available during the year of the issue by contacting the U.S. Mint. Sets from 1936 through 1972 include the cent, nickel, dime, quarter, and half; from 1973 through 1981 the dollar was also included. Regular proof sets issued from 1982 to date contain the cent through half dollar. Special sets containing commemorative coins were sold at an additional premium.

How Mail Bidding at Auction Works

10.

- Bid by mail only if you are not going to attend the auction at the 1999 Rosemont Convention Center on August 14, 1999.
- Carefully look through the catalog, and determine the lots in which you have an interest.
- Fill out your bid sheet, entering your bid on each lot, based upon your price research, your desire to own the lot and how much "auction money" you have earned.
- 4. Determine your limit. After you have totalled your bid sheet, determine what the maximum is that you are able to spend. Remember, if yours is the winning bid, you must purchase the item, using the earned "auction money."
- Total your bid sheet and remember that you may pay for your winning bids only with earned "auction money."
- On your bid sheet, make sure to include your name, address, city, state, zip and phone number. We need your telephone number to communicate any problems or changes that may affect your bids.
- Sign your bid sheet. By you and a parent or guardian signing the bid sheet, you have read and agreed to abide by the Terms of Sale listed in the auction catalog. (See page 5)
- Make a copy of your completed bid sheet for your records.

 Mail or FAX your bid sheet. It must be received at ANA Headquarters by 5:00 p.m. September 15, 1999. Mail your bid sheet to:

> ANA Education Department 818 North Cascade Avenue Colorado Springs, CO 80903

FAX: 719-634-4085

Remember, bids are recorded as they are received. Preference is given to the first bid received in case of a tie. No mail bids will be accepted after 5:00 p.m., September 15, 1999. Winning bidders will be notified by October 15, 1999.

Mail Bid Sheet

All information must be completed:
